: oscarrego.github.io/portfolio Mangalore, Karnataka, India

PROFILE SUMMARY

Software Developer with hands-on experience building full-stack web applications, real-time systems, and AI-powered solutions. Skilled in Python, React.js, APIs, databases, and modern development tools. Experienced in leveraging AI tools for research, rapid prototyping, workflow optimization, and problem-solving. Passionate about AI products, automation, and building user-focused software solutions from concept to deployment.

TECHNICAL SKILLS

Programming Languages & Databases: Python, PHP, Java, SQLite, MongoDB

Web Technologies: HTML, CSS, React.js, Typescript, JavaScript, Tailwind CSS, Node.js

Tools & Technologies: Git, GitHub, Fiddler, Figma, Affinity Designer, Debugging & Memory Inspection

PROJECTS

- **Orbit – Geospatial Tracking & Communication System | April 2026**
  Description: Developed a real-time geospatial tracking and communication platform with live location sharing, room-based messaging, and SOS alert capabilities. Implemented user interaction workflows, WebSocket-based communication, real-time synchronization, and dynamic map visualization to deliver a seamless multi-user experience.
  Tech Stack: React.js, JavaScript, CSS, MapLibre GL JS, Python, Flask, MongoDB, PyMongo, Node.js, Google Analytics, Microsoft Clarity, Git.

- **Sentinel – Real-Time Vehicle and License Plate Recognition System | December 2025**
  Description: Developed a real-time vehicle and license plate recognition system using computer vision and deep learning techniques. Implemented AI-powered vehicle detection, license plate localization, and OCR-based text extraction for offline processing of live CCTV video streams. Built an end-to-end pipeline with configurable detection workflows, real-time visual overlays, and local data storage for monitoring and analysis.
  Tech Stack: Python, OpenCV, Ultralytics YOLO, EasyOCR, PyTorch, PyQt6, SQLite, NumPy, VS Code, Git.

- **StudyGPT – AI-Powered Study Assistant and Learning Platform | November 2024**
  Description: Developed an AI-powered study assistant that enables students to upload PDFs and interact with study materials through a conversational interface. Implemented PDF text extraction, context-aware question answering, note summarization, and quiz generation using Google's Gemini 2.5 Pro & Flash model.
  Tech Stack: React.js, Vite, JavaScript, Python, Flask, Gemini 2.5 Flash API, PyPDF, REST APIs, Git, GitHub

- **Jewellery Store Management System | March 2024**
  Description: Developed a web-based management system to handle jewellery inventory, automate billing operations, and track sales transactions efficiently. Implemented backend business logic and interactive web interfaces to improve data accuracy, operational efficiency, and overall user experience. Integrated inventory tracking, sales reporting, and record management features to support daily business operations effectively.
  Tech Stack: PHP, MySQL, HTML, CSS, JavaScript, Git.

AREA OF INTEREST

Interested in AI Products, Workflow Automation, Product Development, Full-Stack Applications, and Generative AI Solutions. Passionate about leveraging AI tools to solve real-world problems, improve user experiences, and build scalable software systems. Interested in understanding user needs, designing effective workflows, and developing products from idea to deployment.

INTERNSHIP & VOLUNTEERING

- **Junior Web Development Intern | Edutainer (PAT Technologies Private Limited)** — **Feb 2026 – May 2026**
  Completed a Web Development Internship, gaining practical experience in frontend and backend development, application debugging, testing, and responsive web design while working on real-world development tasks.
- **Project Trainee | CodeLab Systems** — **Mar 2024 – Jun 2024**
  Worked on the development of a Jewellery Store Management System at CodeLab Systems, contributing to application development, database management, feature implementation, and testing. Assisted in building inventory tracking, billing, and sales management functionalities to support efficient business operations.
- **Joshiana 14.0 Committee Head,** St. Joseph Engineering College (Autonomous) — **Aug 2025 - Nov 2025**
  Led the planning and execution of competitions involving 96 participants across 32 campuses, overseeing event coordination, tournament operations, and committee activities to ensure smooth and successful execution.
- **Event Coordinator**, Padua College of Commerce & Management — **Sep 2023 - Oct 2023**
  Managed event logistics, participant coordination, and operational activities.

ACADEMIC QUALIFICATIONS

- **Master of Computer Applications**
  St Joseph Engineering College, Vamanjoor, Mangalore 575028 — **8.58 CGPA** — **2024 - 2026**

- **Bachelor of Computer Application**
  Padua College of Commerce & Management, Nanthoor, Mangalore 575004 — **8.41 CGPA** — **2021- 2024**
